

# Oasis In-Line Filter

## Improve the Taste and Quality of Your Drinking Water

The in-line system is connected to flexible water tubing with a simple push-into-place fitting at the top and bottom of the filter - eliminating the extra labor needed in securing the tubes with clamps. The filter body is then secured to the wall by pushing it into the in-line bracket. Ideal in situations where simplicity and space is a priority, the in-line system delivers tasty, reliable and clean water when you need it. Compatible with almost all water appliances including under sink filtration systems, coffee machines, refrigerators, drinking fountains, and POU water coolers.

### Oasis Filter Advantages:

- **Easy to install:** Installs in less than 30 minutes
- **Easy to maintain:** Filter media only needs to be changed every 6 to 12 months depending on media choice
- **Customizable:** A variety of filter elements are available to handle a number of filtration tasks
- **Healthy:** Filters out impurities in the water
- **Eco-Friendly:** Unlike other filtration products, the in-line filter housing is reusable and discarded filters are biodegradable or recyclable
- **Delicious:** Removes odor and undesirable tastes in the water caused by chlorine and other impurities
- **Superior Water Quality:** Can accommodate up to two customized filters for superior water filtration
- **Benefits Your Water Appliances:** Can improve the life and performance of your water appliances by minimizing sediment build up in water pipes and valves
- **Economical:** Lower in cost to purchase and maintain compared to other filtration and bottled water products

### How to Install the In-Line System

1. Screw in the in-line clip mount.
2. Place filter media into outer housing and close the cap tightly.
3. Push in the water tubes into the filter's water inlet side quick-connector and to the water outlet quick-connector (the cap side is the outlet).
4. Click the filter body into the in-line clip mount.

# Filter Media

## Customizable to Fit Your Need

### Select The Filter Media of Your Choice

#### SEDIMENT

100% polypropylene microfibers. Removes sediments & improves the texture & clarity of your water. Dirt holding capacity: 60 gr.

#### CARBON

Activated carbon block filter. Removes chlorine, taste & odor (CTO) & fine particulates from cold water. Capacity - 1000 USG.

#### CARBON/LEAD

Activated carbon block filter. Removes CTO, fine particulates & lead from cold water. Silver acts as a bactericide. Capacity - 1000 USG.

#### GALAXI

Combines activated carbon with a cellulose-free synthetic fiber matrix. Performs as a sediment filter & a carbon block in a single cartridge. Removes CTO, has dirt-holding capacity with a reduced risk of blocking, prevents carbon fines from being released into the water stream, reduces lead & cysts. Capacity - 3000 USG.

#### REMEMEDI

Pleated filter media infused with Powdered Activated Carbon (PAC) further enhanced with nano-technology utilizing the principle of electro-adhesion capable of removing a wide range of water born contaminants. Removes CTO, pharmaceutical & chemical waste, heavy metals (copper, iron, lead, tin), cysts, viruses, & bacteria. Capacity: for lead - 325 USG., for CTO - 2800 USG.

Select the filter media or complete system combination of your choice and determine your product order number

Water Quality Questions				Solution	Replacement
Does your water have cloudiness or sediment?	Does your water have any tastes or smells (like chlorine)?	Will the water be used for a coffee or ice maker?	Is there any chance your water has lead in it?	In-Line Solution	In-Line replacement
