

## Water Where You Need It.

OASIS International is committed to delivering clean drinking water and sustainable hydration solutions.

Tilt 'N Tether is a stand-up solution for any on-the-wall bottle filling station, designed for accessing the filter in the top of the bottle filler

### What's your time worth?

Let's do the math: An estimated 15 minutes saved per every filter change x labor = **\$ SAVINGS!**

## TIRED OF LAYING ON THE FLOOR FOR 20 MINUTES TO CHANGE A FILTER?

The Tilt 'N Tether system is a breakthrough in hydration unit serviceability, exclusively designed by OASIS. It provides fast, ergonomic access for maintenance and filter changes—without the need to remove or fully disassemble your bottle filler.

With just one screwdriver, the unit tilts forward and remains securely tethered, allowing technicians to work safely and efficiently.

### Top 3 Advantages with OASIS Tilt 'N Tether:

#### 01 Accessible in the Top of the Bottle Filler

Effortless filter access with the removal of just two screws. Hassle-free maintenance, thanks to the large opening and filter placement. OASIS makes life easier for maintenance teams with the Tilt 'N Tether, a stand-up solution that minimizes physical strain and reduces exposure to germs by keeping maintenance staff off the floor.

#### 02 Convenient & Hygienic

One screwdriver needed - keeping it simple on your toolbox. Fast access to bottle filler programming, main controls, and troubleshooting. Tether keeps bottle filler stable while changing filter on top of the unit without having to remove the unit from the wall.

#### 03 Efficient with One Filter, One Minute

With one OASIS filter, one minute - filter replacement and/or maintenance can be performed in under one minute. The filter located in the top of the bottle filler will also filter the water from the drinking fountain bubbler!

# TIRED OF LAYING ON THE FLOOR TO CHANGE A FILTER?

## Smart, Simple, and Safer Maintenance for Hydration Solutions

Go From This

To This!

### One Filter. One Minute.

With innovative energy and time-saving features, OASIS products support facility managers!

Tilt 'N Tether is a standard feature included with OASIS on-the-wall bottle filling stations—no upgrade required. The filter located in the top of the bottle filler will also filter the water from the drinking fountain bubbler.

### Why Choose OASIS?

With over 115 years of innovation, OASIS continues to lead the way in safe, sustainable hydration and filtration solutions. The Tilt 'N Tether system is just one of the many ways we make hydration smarter—for both your facilities and your teams. All OASIS indoor filters can be utilized or retrofitted into a Tilt 'N Tether unit.

- All certified filters remove lead, particulate class 1, chlorine, taste, odor, and microplastics.
- Certain filters have the added capability to target other contaminants like Total PFAS and pharmaceuticals.
- All OASIS indoor filters use a universal head for easy swaps, reducing waste and eliminating the need for equipment upgrades.
