Advanced Hydration Meets Modern Design

Designed to elevate hydration spaces, black units offer a modern look and feel that supports design intent without compromising performance.

- **Convenient & Hygienic:** Fast access to bottle filler programming, main controls, and filtration, without having to remove the unit from the wall with Tilt 'N Tether.
- **Certified Filtration:** Filtered models include VersaFilter III certified to NSF/ANSI 42, 53, and 401 for lead, Particulate Class I, chlorine, taste, odor, and microplastics.
- **Clinically Proven UV-C:** For maximum protection, our exclusive QUASAR, UV-C LED disinfects water at the point of dispense on bottle filling stations, reducing 99.9% of harmful microorganisms, including Legionella, Cryptosporidium, Pseudomonas Aeruginosa, T-1 Virus, and Giardia.
