SKYE comes with the same benefits as our RR coolers range.

It has the stylish look of our RR2000 series yet its polyethylene cabinet enables **SKYE** to be at a very attractive price point.

A simplistic and modern design that stands the test of time with the performance of our RR series.

The 'inside-out' cooling probe design used throughout the entire range of REMOVABLE RESERVOIR coolers ensures a more efficient cooling method, conserving energy and eliminating condensation within the cooler.

The self supporting cooler chassis can be quickly and easily removed from the cabinet to simplify the maintenance and servicing process. The REMOVABLE RESERVOIR system simplifies the sanitization process - just replace the water contact parts with pre-sanitized components. Requires no replacement of disposable parts or use of messy chemicals at your customer site.

Reusable Sanitization kits available for this model.
