

OASIS manufactures products for many different export markets around the world and build both 115V and 230V appliances.

Although the mains electrical supply in the UK is 230V, there are certain applications where 115V appliances must be used (e.g. shop floor in factories).

OASIS builds 115V appliances with a number of different power cords (see table below). If ordering 115V appliances, then it is recommended that you advise Customer Services or your Sales Manager of which plug type you require

		
<p>Hard Wired (Permanent Connection) to IEC 60309 Plug</p>	<p>IEC 60320 C14 Connector fitted to Appliance</p>	<p>Hard Wired (Permanent Connection) to NEMA 5/15 Plug</p>
