

Currently sediment filters supplied by OASIS as part of the Green Filter program have been delivered with an end cap and filter mount glued to the filter element.

For this reason, customers needed to order particular filters for EZ-Turn or EZ-Clip applications.

OASIS have now developed a new universal sediment filter that may be used with both EZ-Turn and EZ-Clip systems - the new sediment filter will attach to the Green Filter filter mount in exactly the same way as carbon filter elements.

Customers should now order universal sediment elements for replacement purposes under the part number **036464-102**

	
<p>Original Filter 037069p101 EZ-Turn 037069p103 EZ-Clip</p>	<p>New Universal Filter 036464-102</p>

Note that if you are purchasing universal sediment filters to replace the original sediment filter (i.e. one with mount glued into position), you will need to purchase a replacement mount as well. Part numbers for the mounts are as follows:

EZ-Clip	037056A001	
EZ-Turn	037062A001
