

Following extensive field trials, OASIS is announcing the launch of a new float system for all POU reservoir coolers.

This new float system is a direct replacement for the float system that has been used by OASIS for a number of years. It will be installed as standard equipment in all reservoir based POU units manufactured in the Poland facility.

To place an order for POU Float Assembly, please order OASIS part number **040028P001**

Please note that the old blue float cap is no longer available, but OASIS will continue to offer other spare parts (e.g. air filters, gaskets) for use with the old float system.

Spare part numbers are as follows:

Description	Old Float	New Float
FLOAT CAP ASSEMBLY	N/A	033394-005
ELBOW CONNECTION	028481-001	028481-001
GASKET	033353-002	033353-002
AIR FILTER ASSEMBLY	031823-002	038212-001
