These surface mount hydration station combos have two activation methods. The bottle filler includes an electronic sensor for a contactless (touch free) activation and a 30 second shut off timer. The radii drinking fountain is activated via the push-button.

The Bottle Counter conveniently displays the number of times the unit has been used, encouraging the refill of sports bottles.

Key moulded components shall contain Freshield, which utilises a silver-based antimicrobial compound that reduces the growth of microorganisms and mildew to protect the surfaces from discolouration, odours and degradation.

Suitable for public building, gymnasiums, sports complexes, hospitals, schools, and offices.
