These surface mount hydration station combos have two activation methods. The bottle filler includes an electronic sensor for a contactless (touch free) activation and a 30 second shut off timer. The drinking fountain is activated via the vandal-resistant push-button.

The Bottle Counter conveniently displays the number of times the unit has been used, encouraging the refill of sports bottles.

Key Versafiller moulded components shall contain Freshield, which utilises a silver-based antimicrobial compound that reduces the growth of micro-organisms and mildew to protect the surfaces from discolouration, odours and degradation.

Suitable for public building, gymnasiums, sports complexes, hospitals, schools, and offices.
