

## CONVERSION KIT PN8EBFY ■ Contactless, Refrigerated, Cooler to Bottle Filler

Replace your existing drinking fountain and abandon the bubbler! AquaPointe PN8EBFY used the same rough-in opening, piping and electrical system already in place – making this retrofit quick and easy!

AquaPointe PN8EBFY is a surface mount unit that delivers chilled drinking water. This refrigerated bottle filler is perfect for those high traffic areas. With a contactless, touch-free activation – there are no fears of cross-contamination.

The Bottle Counter conveniently displays the number of times the unit has been used, encouraging the refill of sports bottles.

Key bottle filler moulded components shall contain Freshield, which utilises a silver-based antimicrobial compound that reduces the growth of micro-organisms and mildew to protect the surfaces from discolouration, odours and degradation. Basin is designed to eliminate splashing and standing water.
