WALL-MOUNTED REFRIGERATED BOTTLE FILLER

Abandon the bubbler for better aesthetics, chilled water on-demand.

More schools, hospitals and offices are abandoning the bubbler in this post-COVID world.

Beyond any retrofit kit on the market, the OASIS PGN8EBF is a better bottle filler for multiple reasons.

For starters, many facilities have older drinking fountains that won't work with existing retrofit kits. The PGN8EBF is a great way to upgrade your entire facility aesthetics, while providing safe, touch-free water dispensing at the same time.

Plus, it can be done easily and quickly using the same rough-in opening, piping and electrical systems already in place.

INDUSTRY LEADING INNOVATION; EASY INSTALLATION

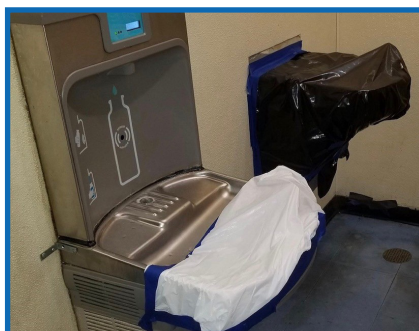

Why PGN8EBF:

- Abandon the bubbler for safe, touch-free operation
- Delivers gallons of chilled water on demand, filling a standard sports bottle 6X faster than the bubbler
- Single product can replace multiple makes and models
- Stainless steel cabinet gives your facilities a clean, consistent look
- Matches existing wall rough-in so there's no demo work; easy to install
- Uses same piping and electrical systems, saving time and money
- Side access to bottle filler makes filter changes quick, clean and easy (Filter kit sold separately)
- No tray to collect debris or garbage
- Industry leading 5-year warranty for added peace of mind

Upgrade the aesthetics of your entire facility quickly and easily with the worry-free PGN8EBF.

Boasting incomparable reliability, OASIS gives you peace of mind with a bottle filler that works as expected. An industry-leading 5-year limited warranty is further assurance of many years of reliable performance vs. competitive products.

Installation couldn't be easier thanks to its universal rough-in, which means there's no new cutting into walls, reinstalling pipes or electrical connections. Better yet, there's no more laying on the ground to replace filters. Easy side access lets you replace them in just a couple minutes.

Unused water coolers can attract trash, mold, dust, and germs.

Filter mounts through the side of the bottle filler cabinet for clean and easy filter exchanges.
